PROFESSIONAL SUMMARY

MCA (Data Science) student with a strong foundation in Python, SQL, data analysis, machine learning, and data visualization. Hands-on experience in data cleaning, data preprocessing, exploratory data analysis (EDA), feature engineering, and developing data-driven solutions through academic projects. Proficient in Pandas, NumPy, Scikit-learn, Matplotlib, and Power BI, with knowledge of statistical analysis, predictive modeling, and interactive dashboard development. Seeking an entry-level opportunity in data analytics or data science to apply analytical and problem-solving skills to real-world business challenges.

EDUCATION

Master of Computer Applications (MCA) - Data Science 2025 – 2027
Alliance University Bengaluru
CGPA: 8.55

Bachelor of Computer Applications (BCA) 2022 – 2025
Vishwa Chethana Degree College, Bangalore University Bengaluru
Percentage: 83.51%

TECHNICAL SKILLS

Programming Languages: Python, Java, SQL
Core CS: Data Structures and Algorithms, OOP, Operating Systems, DBMS, Computer Networks
Data Science & Machine Learning: Data Analysis, Exploratory Data Analysis (EDA), Data Cleaning, Data Preprocessing, Feature Engineering, Regression, Classification, Clustering, Anomaly Detection, Model Evaluation
Databases: MySQL, MongoDB
Libraries & Frameworks: Pandas, NumPy, Scikit-learn, Matplotlib, TensorFlow, Keras
Tools: GitHub, VS Code

PROJECTS

AI-Powered Customer Churn Prediction and Retention Analytics System
- Developed a machine learning application to predict customer churn using Logistic Regression, Decision Tree, Random Forest, and Gradient Boosting, evaluating performance using accuracy, precision, recall, F1-score, and ROC-AUC.
- Built an interactive Streamlit dashboard featuring batch CSV predictions, churn analytics, feature importance visualization, input validation, and downloadable prediction results

UPI SecurePay
- Developed a UPI fraud detection system using Python, Pandas, and Isolation Forest for unsupervised anomaly detection on transaction data.
- Identified suspicious UPI payments by analyzing transaction patterns and behavioral anomalies to support fraud detection.

Green Route Travel Recommendation System
- Developed a web-based travel recommendation system using Python and Streamlit to suggest eco-friendly routes based on distance and travel time.
- Designed an interactive user interface to help users compare travel options and choose efficient, sustainable routes

INTERNSHIP

Techxonic Innovation Jan 2025 – May 2025
Data Science Intern Bengaluru
- Performed Exploratory Data Analysis (EDA) on real-world datasets using Python to identify patterns, trends and insights.
- Conducted data cleaning, preprocessing and feature engineering to improve data quality.
- Used Pandas, NumPy, Matplotlib and Seaborn for statistical analysis and data visualization.
- Applied machine learning techniques, analysed correlations and outliers, and evaluated predictive models to generate actionable insights.

CERTIFICATES

- Data Analysis Using Python -Penn
- Applied Statistics for Data Analytics - DeepLearning.AI
- Introduction to Databases - Meta
- Advanced Data Structures and Algorithms -Packt
- Data Analysis and Visualization with Power BI -Microsoft
